BIOL 201 Microbiology Laboratory
Credit Hours: 1
Scheduled hours per week
  Lecture: 0
  Lab: 2
  Other: 0

Catalog Course Description: Biology 201 is designed to accompany Biology 200 (Microbiology) lecture to practical laboratory experiences for students requiring a basic medical microbiology course to meet program requirements or as a science elective. Topics include staining procedures, observations and study of fixed specimens using the microscope, and culturing and identifying living microorganisms.

Pre-requisites: BIOL 107 and 108; or BIOL 101/103 and 102/104

Co-requisites: BIOL 200

Course Learning Outcomes:
- Demonstrate acceptable microscopic technique.
- Describe the preparation of bacteriological media.
- Describe the sterilization methods for bacteriological media.
- Isolate bacteria from simulated clinical specimens.
- Demonstrate collection of microbiological specimens.
- Demonstrate aseptic technique in handling microbiological specimens.
- Perform the Gram stain technique.
- Perform such special staining techniques as the acid-fast stain, the capsule stain, and the spore stain.
- Identify according to genus selected saprophytic fungi.
- Identify by microscopy selected animal parasitic agents.
- Identify by simple biochemical tests selected medically important bacteria.
- Perform antimicrobial susceptibility testing.
- Perform disinfection techniques.

Topics to be studied:
- Lab Safety
- Cell Structure and function
- Metabolism
- Microbial growth
- Identification of microbes
- Bacteria
- Yeast and molds
- Antimicrobial drugs

Relationship of Course to Program or Discipline Learning Outcomes:

WVUP UCS Form Revised June 2017
| Students exhibit the basic safety-related rules and regulations of working in the lab. | X |
| Students be able to recount the basic safety tenants associated with a specific scientific discipline. | X |
| Students will become proficient at Science Writing. | |
| Students will recognize and identify the applications of their specific discipline in the ‘real world.’ | X |
| Students will accurately recount important milestones in the history of scientific inquiry in their discipline. | |
| 5/3/2016 | |

**Relationship of Course to General Education Learning Outcomes:**

| Composition and Rhetoric | Students illustrate a fundamental understanding of the best practices of communicating in English and meet the writing standards of their college or program-based communication requirements. |
| Science & Technology | Students successfully apply systematic methods of analysis to the natural and physical world, understand scientific knowledge as empirical, and refer to data as a basis for conclusions. X |
| Mathematics & Quantitative Skills | Students effectively use quantitative techniques and the practical application of numerical, symbolic, or spatial concepts. |
| Society, Diversity, & Connections | Students demonstrate understanding of and a logical ability to successfully analyze human behavior, societal and political organization, or communication. |
| Human Inquiry & the Past | Students interpret historical events or philosophical perspectives by identifying patterns, applying analytical reasoning, employing methods of critical inquiry, or expanding problem-solving skills. |
| The Arts & Creativity | Students successfully articulate and apply methods and principles of critical and creative inquiry to the production or analysis of works of art. |
| 5/3/2016 | |

**Special requirements of the course:**

None

**Additional information:**

None
