

CHEM 236 Organic Chemistry 2 Lab**Credit Hours:** 1**Scheduled hours per week**

Lecture: 0

Lab: 3

Other: 0

Catalog Course Description: An introduction to microscale techniques of organic chemistry preparation and purification, this lab is designed to be taken concurrently with CHEM 233. Techniques studied will be re-crystallization, distillation, extraction and preparation of simple aliphatic compounds.

Pre-requisites: CHEM 115, CHEM 115L; CHEM 116, CHEM 116L; CHEM 233, CHEM 235

Co-requisites: CHEM 234

Course Learning Outcomes:

- To develop proficiency in micro-scale organic synthetic techniques
- To increase student confidence in synthesis, including multi-step synthesis
- To introduce students to instrumental analysis techniques
- To introduce students to qualitative analysis of organic compounds
- To investigate the chemistry of carbonyl compounds and aromatic compounds

Topics to be studied:

- Safe working practices
- Reactions of aromatic compounds
- Spectroscopy and mass spectroscopy
- Qualitative analysis
- Multi-step synthesis
- Student designed synthesis of esters
- Grignard reagent
- Reactions of the carbonyl group
- Individually designed experiments

Relationship of Course to Program or Discipline Learning Outcomes:

Relationship of Course to Science Learning Outcomes:	
Students will learn the process and reasoning behind the Scientific Method and be able to conduct experiments that meet the requirements of the model.	X
Students exhibit the basic safety-related rules and regulations of working in the lab.	X
Students be able to recount the basic safety tenants associated with a specific scientific discipline.	X
Students will become proficient at Science Writing.	X
Students will recognize and identify the applications of their specific discipline in the 'real world.'	X
Students will accurately recount important milestones in the history of scientific inquiry in their discipline.	X

9/3/2017	
----------	--

Relationship of Course to General Education Learning Outcomes:	
Composition and Rhetoric Students illustrate a fundamental understanding of the best practices of communicating in English and meet the writing standards of their college or program-based communication requirements.	
Science & Technology Students successfully apply systematic methods of analysis to the natural and physical world, understand scientific knowledge as empirical, and refer to data as a basis for conclusions.	X
Mathematics & Quantitative Skills Students effectively use quantitative techniques and the practical application of numerical, symbolic, or spatial concepts.	X
Society, Diversity, & Connections Students demonstrate understanding of and a logical ability to successfully analyze human behavior, societal and political organization, or communication.	
Human Inquiry & the Past Students interpret historical events or philosophical perspectives by identifying patterns, applying analytical reasoning, employing methods of critical inquiry, or expanding problem-solving skills.	
The Arts & Creativity Students successfully articulate and apply methods and principles of critical and creative inquiry to the production or analysis of works of art.
